Foam Cabinet

HEBA provides a wide range of effective FOAM/WATER CABINETS, these cabinets are designed in such a way that one person can operate one unit both safe and effectively. These cabinets have high performance for extinguishing class A and B fire classes. Gas stations, Petrochemical Plants, Industrial Premises, and Warehouses are nothing but few where these cabinets can be installed.

All Fire Hose Cabinet as well as sheet-made parts are:

Constructed from 1.2 mm Cold Rolled Steel (CRS), with all round folded edges, even Hose Reel edges are curled to assure the safe handling. Heba Fire Hose Cabinets are fabricated with Metal Inert Gas Welding Process, then, pretreated with zinc phosphate to improve rust resistance, afterwards, they are electrostatically painted with red polyester resin paint before being baked in the oven to give a hard wearing resistance, and gloss finish.

Fire Hose cabinets are Painted Red color polyester resin-Texture finish.

Hose reels have been hydrostatically tested to 20 bar pressure for leaks. High level quality control standards are implemented to get quality products.

HEBA is not only manufacturing your designs, but also makes your dreams come true.
